

We can host a
**Corporate
Electric Vehicle
Experience**
at your business

Let our EV ambassadors educate your staff about the benefits of electric cars, show them what models are available, point out local charge points, and let them test drive an EV and experience the thrill of constant torque.

We'll provide interactive information sessions, answer your questions and address employee concerns, and bring multiple types of EVs with us for your staff to drive for themselves.

Promote environmental responsibility

Show your organization's good corporate citizenship by promoting clean fuel commuting options to staff

No cost to your company

We've partnered with dealers, manufacturers, and educators to bring the EV experience to you free of charge.

Experience the thrill of driving an EV

Electric vehicles have constant torque and handle better than any car you've ever driven. We promise: you've never had such fun behind the wheel.

Why drive an electric vehicle?

EVs have zero tailpipe emissions, save owners money on fuel costs, and there are more choices than ever before. Most of all, they're genuinely fun to drive!

Why work with us?

We've got nearly two decades of experience working with alternative fuels, have statewide partnerships with major EV manufacturers, and **bring our passion about electric cars to everything we do.**

📍 311 Conference Center Building, Knoxville TN

We bring a ready-made team

ETCleanFuels has pulled together electric vehicle OEM and dealership partners to deliver an EV Experience that will allow staff at your business to drive several different all-electric or plug-in-hybrid electric vehicles.

We cover all of the costs

There is no cost to your business or employees to host and participate in the EV Experience.

We want to get you behind the wheel

Our primary goal is to put your staff behind the wheel of an EV so that they can be enlightened to the benefits of electric vehicles, both for them and for the community and world.

Drive Electric TN EV EXPERIENCE

Business size doesn't matter

We will work with businesses that have less than 50 employees all the way up to companies that have thousands of employees, and cater the event at your site to your business and employees.

We'll cover EV charging, too

The Experience will include discussion on EV charging: How do you charge your EV at home? Where are public EV charging stations in your area? What can a Workplace Charging program or plan look like for your business?
